

The value of investments can fall. Investors may not get back the amount invested.
Income from investments may vary and is not guaranteed.

BNY MELLON

MULTI-ASSET GROWTH FUND

Active investing for
long-term growth

IMPORTANT INVESTOR INFORMATION

For definitions of the investment related terms included in this document, please refer to the glossary on page 10.

BNY Mellon Multi-Asset Growth Fund

FUND OBJECTIVE

The Fund aims to achieve capital growth and income over the long term (5 years or more).

FUND BENCHMARK

The Fund will measure its performance against the UK Investment Association Flexible Investment NR Sector average as a comparator benchmark (the "Benchmark"). The Fund will use the Benchmark as an appropriate comparator because it includes a broad representation of funds with the same flexibility, in terms of equity and bond exposure, as the Fund. The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies as disclosed in the Prospectus.

PERFORMANCE – 12-MONTH RETURNS (%)

Period	October 2018 to October 2019	October 2019 to October 2020	October 2020 to October 2021	October 2021 to October 2022	October 2022 to October 2023
Fund	11.18	-0.60	32.82	-1.29	0.96
Benchmark	7.56	0.16	22.45	-10.58	2.02

CALENDAR PERFORMANCE (%)

Period	2018	2019	2020	2021	2022
Fund	-5.44	20.70	10.97	19.55	-3.00
Benchmark	-6.84	16.10	6.74	12.27	-9.74

Past performance is not a guide to future performance.

Source for all performance: Lipper as at 31 October 2023. Fund Performance for the Institutional Shares W (Accumulation) share class calculated as total return, including reinvested income net of UK tax and charges, based on net asset value. All figures are in GBP terms. The impact of an initial charge (currently not applied) can be material on the performance of your investment. Further information is available upon request.

INTRODUCTION

Investing in shares is a well-trodden path for growing the long-term value of your savings. But an investment strategy that also includes bonds and other assets can provide additional opportunities while reducing risk.

An investment strategy that also includes bonds and other assets can provide additional opportunities while reducing risk.

The BNY Mellon Multi-Asset Growth Fund focuses on shares, but also holds some bonds, alternative assets such as property and infrastructure, and cash.

It invests globally and flexibly, with the managers able to change the percentage of equities and other assets in the Fund to suit market conditions.

This brochure summarises the features and benefits of the BNY Mellon Multi-Asset Growth Fund and its investment process.

Your financial adviser, using their knowledge of your savings goals and appetite for investment risk, will be able to suggest if this is an appropriate fund for your needs.

There is no guarantee the Fund will achieve its objectives.

Investments can be affected by interest rates and inflation trends, which may negatively affect the value of the Fund.

This Fund invests in international markets. This means it is exposed to changes in currency rates, which could affect the value of the Fund.

BNY MELLON MULTI-ASSET GROWTH FUND AT A GLANCE

Focused on shares

Aiming to outperform through active stock-picking, rather than passively tracking a market index.

Multi-asset flexibility

Freedom to choose the best mix of shares, bonds, alternative assets such as property, renewable energy and cash.

Managed for long-term growth

Targeting equity-like returns with lower volatility.

Experienced team

Managed by an expert team from Newton Investment Management which has a strong track record of performance through multiple market cycles.

Competitively priced

You pay just £7.30 a year per £1,000 invested* (plus any fees to your adviser).

WHAT IS A MULTI-ASSET FUND?

Multi-asset funds offer a well-established, convenient way for investors to save for and during retirement. They combine a mix of assets, including shares, bonds and cash, with investments spread across a range of countries and business sectors. This wide diversification helps reduce risk as investors are not “putting all their eggs in one basket”.

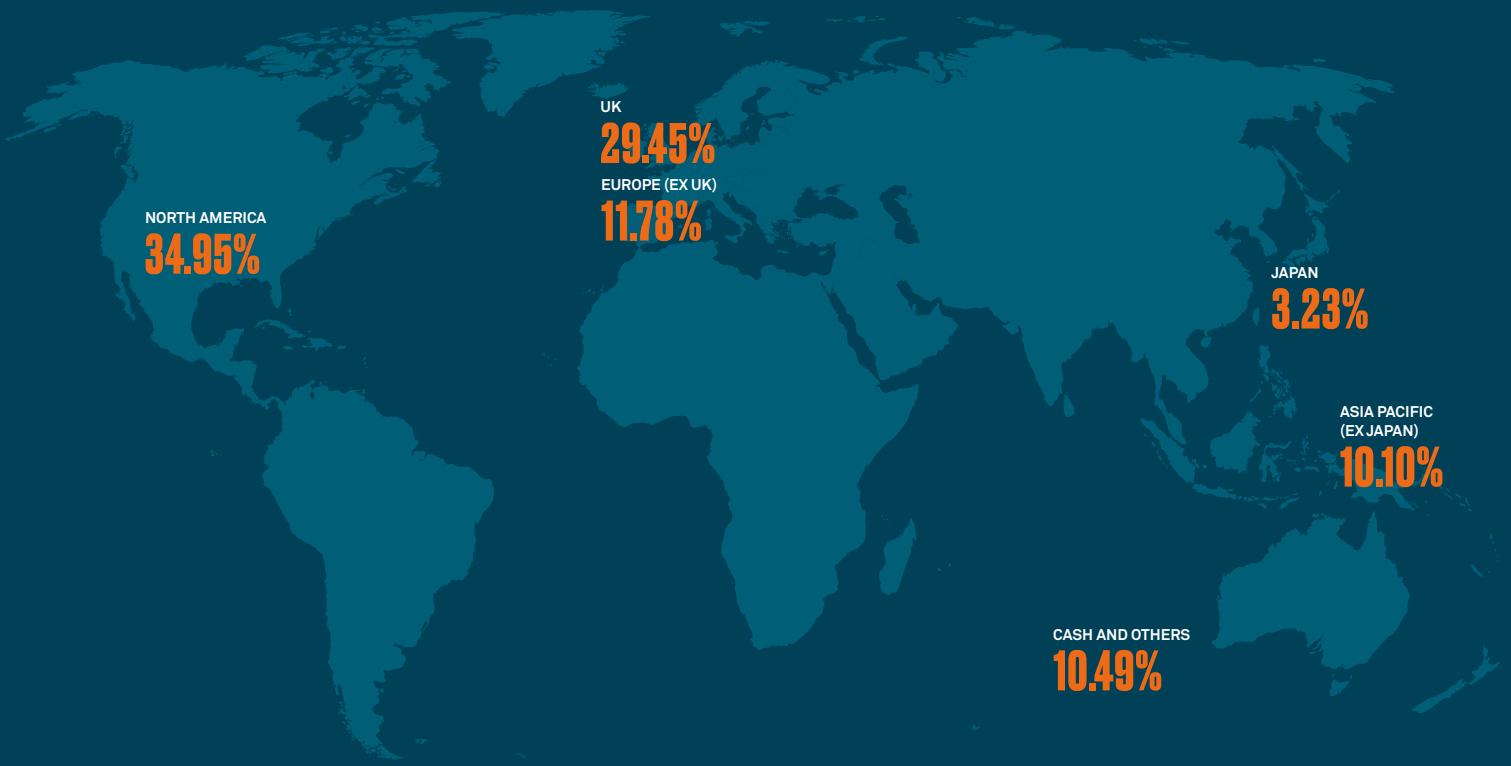

WHO IS NEWTON?

Newton Investment Management is a multi-award winning, global investment manager owned by BNY Mellon. It has decades of experience in multi-asset investing, with 37 portfolio managers focused on these strategies. Multi-asset investments represent £11.1bn out of Newton's total of £83.6bn assets under management, as at 30 September 2023.

* As at 23/05/2023. Based on the ongoing charge figure (OCF) for the BNY Mellon Multi-Asset Growth Fund's Institutional Shares W (Income) share class. The OCF represents the amount an investor will pay for the service provided by a fund. It is made up of the manager's fees along with other costs, such as administration.

HOW THE FUND WORKS

The Fund is managed using a disciplined four-step investment process to achieve capital growth from an equity-focused portfolio.

STEP 1:

Identifying big-picture themes

The Fund's investment process starts with the big picture: what are the global themes and long-term trends that are creating opportunities and risk for investors? From the *internet of things* to *financialisation* to *China influence*¹, this top-down perspective helps to narrow the universe of companies and markets the managers may wish to invest in.

STEP 2:

Picking the right investments

The managers draw on Newton's global multidimensional research, to help identify attractive investments to tap into specific sector trends. With the Fund's objective of long-term capital growth, it mainly invests in shares of individual companies. But it also has some exposure to bonds, alternative assets such as property, renewable energy and infrastructure, and cash.

STEP 3:

Putting it all together

The Fund's portfolio is relatively concentrated, with about 50 to 70 individual equities, reflecting the managers' "high conviction" approach to stock-picking. The amount of the Fund invested in each holding depends on the managers' view of how strong its prospects are versus the risks, and how it helps to diversify the portfolio.

STEP 4:

Staying flexible

As well as picking the individual stocks, the managers decide the overall mix of investments in the Fund. The Fund is invested without country or sector constraints, and the managers have the flexibility to increase or decrease its equity and other exposures as market conditions change.

WHY THIS FUND MAY BE OF INTEREST TO YOU

- ✓ You are willing and able to accept investment risk in pursuit of potential return.
- ✓ You are investing for the medium to long-term (typically 5 years or more).
- ✓ You want to invest in a broad, diverse range of investment types focused on growth.
- ✓ You want to be able to invest globally.
- ✓ You want your investments to be actively managed by experts.

The value of investments can fall. Investors may not get back the amount invested. Income from investments may vary and is not guaranteed.

GLOSSARY

ABSOLUTE RETURN Aims to achieve a positive return over a set timeframe and in all market conditions, although this is never guaranteed.

ACTIVE MANAGEMENT A process whereby an investment professional actively makes buy, hold and sell decisions and aims to outperform the overall market.

ALTERNATIVES An alternative is a financial asset that does not fall into one of the conventional investment categories, such as equities or bonds.

ASSET(S) In this context, investments held in a portfolio, for example stocks, bonds, property and cash.

ASSET ALLOCATION An investment strategy that aims to balance risk and reward by apportioning a portfolio's assets according to an individual's goals, risk tolerance, and investment horizon.

ASSET CLASS A grouping of investments that exhibit similar characteristics and are subject to the same laws and regulations.

BASIC MATERIALS The sector of companies involved in the discovery, development and processing of raw materials. The sector includes the mining and refining of metals, chemical products and forestry products.

BENCHMARK A baseline for comparison against which a fund can be measured.

BOND(S) A loan of money by an investor to a company or government for a stated period of time in exchange for a fixed interest rate payment and the repayment of the initial amount at its conclusion.

CAPITAL GROWTH When the current value of an investment is greater than the initial amount invested.

COMMODITY/COMMODITIES An asset in the form of a raw material that can be bought and sold such as gold, oil, coffee, wheat, etc.

CONSUMER DISCRETIONARY Goods and services considered non-essential by consumers but desirable if their income is sufficient to purchase them.

CONSUMER STAPLES Goods and services that people are unable or unwilling to cut out of their budgets regardless of their financial situation.

CONVERTIBLE(S)/BOND(S) A convertible bond is a fixed income debt security that yields interest payments, but can be converted into a predetermined number of equity shares. The conversion from the bond to stock can be done at certain times during the bond's life and is usually at the discretion of the bondholder.

DERIVATIVES Financial contracts, set between two or more parties, that derive their value from an underlying asset, group of assets, or benchmark.

DIVERSIFIED/DIVERSIFICATION Investing in a variety of companies or financial instruments, which typically perform differently from one another.

DIVIDEND(S) A sum paid regularly by a company to its investors as a reward for holding their shares.

EQUITY/EQUITIES Shares issued by a company, representing an ownership interest.

FINANCIALS A sector made up of companies that provide financial services.

INDEX/INDICES A portfolio of investments representing a particular market or a portion of it. For example: The FTSE 100 is an index of the shares of the 100 largest companies on the London Stock Exchange.

INDUSTRIALS The industrial goods sector includes stocks of companies that mainly produce capital goods used in manufacturing, resource extraction, and construction.

INFLATION/INFLATIONARY The rate of increase in the cost of living. Inflation is usually quoted as an annual percentage, comparing the average price this month with the same month a year earlier.

MULTI-ASSET An investment containing more than one asset class, such as cash, equity or bond.

PORTFOLIO A collection of investments.

RETURN(S)/RETURNED The gain or loss from an investment over a stated period of time – expressed in either percentage or cash terms.

SECTORS An area of the economy in which businesses share the same or related business activity, product, or service.

STOCK Also known as equity, is a security that represents the ownership of a fraction of the issuing corporation.

VOLATILE/VOLATILITY Large and/or frequent moves up or down in the price or value of an investment or market.

YIELD Income received from investments, either expressed as a percentage of the investment's current market value, or dividends received by the holder.
