

REASONS WHY:

BNY MELLON **MULTI-ASSET INCOME FUND**

This document is designed to support financial advisers when recommending the BNY Mellon Multi-Asset Income Fund to a client. It may be useful for helping your client understand more about what they will be investing in and how their investment will be managed. The full fund literature including the prospectus and KIID can also be found at www.bnymellonim.com

Why Multi-Asset?

Multi-asset funds are a well-established, convenient way for investors to save for and during retirement. They combine a mix of assets, including equities, bonds and cash, with investments spread across a range of countries and business sectors. This wide diversification helps reduce risk as investors are not "putting all their eggs in one basket".

Why invest in the BNY Mellon Multi-Asset Income Fund?

With inflation pushing up living costs, many people are looking to increase their income. Choosing an investment that offers a growing stream of income can help you manage in a world of ever-higher prices.

The BNY Mellon Multi-Asset Income Fund is designed to provide investors with reliable and increasing income, while also aiming for long-term capital growth. The Fund offers the convenience of monthly income payments from a broad and diversified portfolio of shares, bonds and alternative assets such as property and renewable energy.

What does the Fund invest in?

The Fund invests globally in a mix of shares of individual companies, government and corporate bonds, alternative assets and cash.

BNY MELLON MULTI-ASSET INCOME FUND

FEATURES AT-A-GLANCE:

- **Actively managed by multi-asset experts at Newton**
The Fund seeks to outperform markets through expert stock-picking, rather than just tracking an index.
- **Targeting an attractive income and convenient monthly payouts**
Investment income is spread throughout the year and paid out each month.
- **Global diversification**
Actively invested in a mix of individual shares and bonds, along with cash and alternative assets such as property and renewable energy.
- **Competitively priced**
Annual management charges compare well with many active competitors.

How does the BNY Mellon Multi-Asset Income Fund generate income?

The BNY Mellon Multi-Asset Income Fund produces income payments by investing in shares that pay increasing dividends, as well as other assets such as property and infrastructure whose incomes can rise over time.

This reflects Newton’s strategy of avoiding many of the highest-yielding dividend payers that some funds chase, which can sometimes come at the expense of capital returns and providing a smoothed return over time.

The Fund provided a historic yield of 4.40% as at 31 March 2024¹, with a record of steadily growing that income in pounds and pence. Investing £100,000 in the Fund from launch on 4 February 2015 to 29 February 2016 would’ve generated an income of £3,766, increasing to £5,350 for the period from 28 February 2023 to 29 February 2024².

1. The Fund’s historic yield reflects distributions declared over the past twelve months as a percentage of the Fund’s share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. 2. This is for illustrative purposes only and does not take into account effects of inflation or other factors that may have a negative impact on an investment.

WHY NEWTON?

Newton Investment Management is a multi-award winning, global investment manager owned by BNY Mellon. It has deep experience of multi-asset investing, having managed such portfolios since 1978.

Newton has 39 multi-asset portfolio managers who between them manage £13.9bn in multi-asset strategies, out of the firm’s total of £86.9bn assets under management.

As at 31 March 2024.

WHO IS BNY MELLON INVESTMENT MANAGEMENT?

BNY Mellon Investment Management is a leading investment manager with US\$2.0 trillion of assets under management (as at 31 March 2024). It is the investment arm of BNY Mellon, one of the world’s largest financial services groups.

BNY Mellon owns a range of specialist investment brands, including Newton Investment Management, which offer investment solutions across all the major asset classes. BNY Mellon’s organisational model enables each of its specialist brands to maintain their own investment philosophy, process and culture, while benefitting from the operational infrastructure and stability of a much larger organisation.

BNY Mellon Multi-Asset Income Fund

OBJECTIVE

The Fund aims to achieve income together with the potential for capital growth over the long term (5 years or more).

BENCHMARK

The Fund will measure its performance against a composite index, comprising 60% MSCI AC World NR Index and 40% ICE Bank of America Global Broad Market GBP Hedged TR Index, as a comparator benchmark (the “Benchmark”). The Fund will use the Benchmark as an appropriate comparator because the Investment Manager utilises this index when measuring the Fund’s income yield. The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. While the Fund’s holdings may include constituents of the Benchmark, the selection of investments and their weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

PERFORMANCE - 12-MONTH RETURNS (%)

Period	March 2019 to March 2020	March 2020 to March 2021	March 2021 to March 2022	March 2022 to March 2023	March 2023 to March 2024
Fund	-12.10	35.13	9.32	0.34	4.09
Benchmark	-1.65	22.75	5.51	-3.31	13.20

CALENDAR YEAR PERFORMANCE (%)

Period	2019	2020	2021	2022	2023
Fund	15.61	4.08	11.53	0.62	3.31
Benchmark	15.46	10.53	10.73	-10.21	11.39

Source: Lipper as at 31 March 2024. Fund performance for the Institutional Shares W (Income) calculated as total return, including reinvested income net of UK tax and charges, based on net asset value. All figures are in GBP terms. The impact of an initial charge (currently not applied) can be material on the performance of your investment. Further information is available upon request.

KEY INVESTMENT RISKS

- **Objective/Performance Risk:** There is no guarantee that the Fund will achieve its objectives.
- **Currency Risk:** This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- **Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- **Changes in Interest Rates & Inflation Risk:** Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- **Credit Ratings and Unrated Securities Risk:** Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- **Credit Risk:** The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- **Emerging Markets Risk:** Emerging Markets have additional risks due to less-developed market practices.
- **Charges to Capital:** The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.
- **Shanghai-Hong Kong Stock Connect and/or the Shenzhen- Hong Kong Stock Connect (“Stock Connect”) risk:** The Fund may invest in China A shares through Stock Connect programmes. These may be subject to regulatory changes and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund’s ability to achieve its investment objective.
- **China Interbank Bond Market and Bond Connect risk:** The Fund may invest in China interbank bond market through connection between the related Mainland and Hong Kong financial infrastructure institutions. These may be subject to regulatory changes, settlement risk and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund’s ability to achieve its investment objective.
- **CoCo’s Risk:** Contingent Convertible Securities (CoCo’s) convert from debt to equity when the issuer’s capital drops below a pre-defined level. This may result in the security converting into equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.
- **Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- **Investment in Infrastructure Companies Risk:** The value of investments in Infrastructure Companies may be negatively impacted by changes in the regulatory, economic or political environment in which they operate.
- **High Yield Companies Risk:** Companies with high-dividend rates are at a greater risk of not being able to meet these payments and are more sensitive to interest rate risk.

GLOSSARY

ACTIVE MANAGEMENT A process whereby an investment professional actively makes buy, hold and sell decisions and aims to outperform the overall market.

ASSET(S) In this context, investments held in a portfolio, for example stocks, bonds, property and cash.

BENCHMARK A baseline for comparison against which a fund can be measured.

BOND(S) A loan of money by an investor to a company or government for a stated period of time in exchange for a fixed interest rate payment and the repayment of the initial amount at its conclusion.

CAPITAL Resources or money used or available for use in the production of more wealth.

CAPITAL GROWTH When the current value of an investment is greater than the initial amount invested.

DIVERSIFIED/DIVERSIFICATION/DIVERSIFIERS

Investing in a variety of companies or financial instruments, which typically perform differently from one another.

DIVIDEND(S) A sum paid regularly by a company to its investors as a reward for holding their shares.

EQUITY/EQUITIES Shares issued by a company, representing an ownership interest.

INDEX/INDICES A portfolio of investments representing a particular market or a portion of it. For example: The FTSE 100 is an index of the shares of the 100 largest companies on the London Stock Exchange.

MULTI-ASSET An investment containing more than one asset class, such as cash, equity or bond.

PORTFOLIO A collection of investments.

RETURN(S)/RETURNED The gain or loss from an investment over a stated period of time – expressed in either percentage or cash terms.

YIELD Income received from investments, either expressed as a percentage of the investment's current market value, or dividends received by the holder.

Past performance is not a guide to future performance.

The Fund can invest more than 35% of net assets in different Transferable Securities and Money Market Instruments issued or guaranteed by any EEA State, its local authorities, a third country or public international bodies of which one or more EEA States are members.

The value of investments can fall. Investors may not get back the amount invested. Income from investments may vary and is not guaranteed.
